Name Amandeep Singh

Roll NO. : 2401010047

Section-B

Course : B .Tech CSE Core

Assignment: 1

❖ **Aim :**
To build a **dynamic To-Do List web application** using **HTML, CSS, JavaScript**, and a **database backed** to **add, edit, delete, and manage tasks permanently** with full CRUD functionality.

❖ **Tasks:**

- **Project Setup & Introduction** – Create project folders (frontend & backend) and link HTML, CSS, JS files.
- **UI Layout (HTML)** – Input field for task, optional description, priority dropdown, Add Task button, task list section, filter buttons (All/Active/Completed), and counters.
- **Styling (CSS)** – Centered , mobile-friendly layout, completed task styling, priority badges, button hover effects.
- **Frontend Interactivity (JS)** – Add, edit, delete, complete tasks; filter tasks; show counts; input validation.
- **Backend + Database** – Use Node.js + Express + SQLite (or other backend) to persist tasks.
- **REST API Implementation** – CRUD endpoints: GET, POST, PUT, PATCH, DELETE for tasks.
- **Bonus Features (Optional)** – Search, sort, due dates, local Storage fallback, JSON export, basic authentication.

❖ **Tech Stack Used:**
- **Frontend:** HTML, CSS, JavaScript
- **Backend:** Node.js, Express
- **Database:** SQLite (or MySQL/other as per setup)
- **APIs:** RESTful APIs for CRUD operations

❖ Html Code :

```
<!doctype html>
<html lang="en">

<head>
  <meta charset="UTF-8" />
  <meta name="viewport" content="width=device-width, initial-scale=1.0" />

  <title>My To-Do List</title>

  <link rel="preconnect" href="https://fonts.googleapis.com">
  <link rel="preconnect" href="https://fonts.gstatic.com" crossorigin>

  <link
href="https://fonts.googleapis.com/css2?family=Inter:wght@400;500;600;700&displa
y=swap" rel="stylesheet">

  <link rel="stylesheet" href="style.css">
</head>

<body>
